

# RPL1 POWER CONTROLLER

**FEATURES:**

- For power control of resistive and resistive-inductive load (transformer connected to resistive load or to rectifier circuit).
- Control mode: on/off (similar to solid state relay), pulse, phase.
- Amplification of input control signal (SPAN).
- Limitation of load current.
- Overload protection.
- Signalization of exceeding the maximum temperature of radiator.
- Control of 3-phase load (requires two RPL1 controller units).

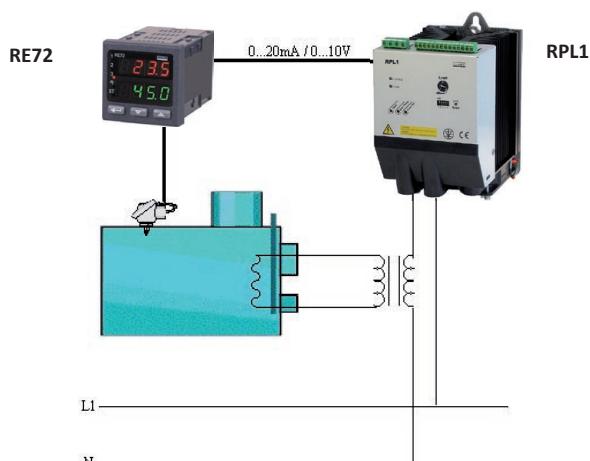

**INPUT:**

**OUTPUT:**

**GALVANIC ISOLATION:**

**EXAMPLE OF APPLICATION**

**INPUTS**

Input type	Quantity	Range	Remarks
Synchronization input	-	230 V a.c. – version RPL1-xx1xx, 400 V a.c. – version RPL1-xx2xx, 500 V a.c. – version RPL1-xx3xx	-
Control voltage input	1	0..5 V 0...10 V	$R_{in} = 20 \text{ k}\Omega$ $R_{in} = 40 \text{ k}\Omega$
Control current input	1	0(4)...20 mA	$R_{in} = 125 \Omega$
Control pulse input	1	0/4...32 V	$R_{in} = 20 \text{ k}\Omega$
STOP signal input	1	4...8 V	$R_{in} = 1 \text{ k}\Omega$

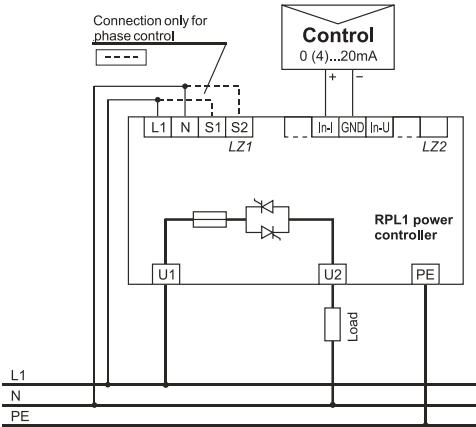

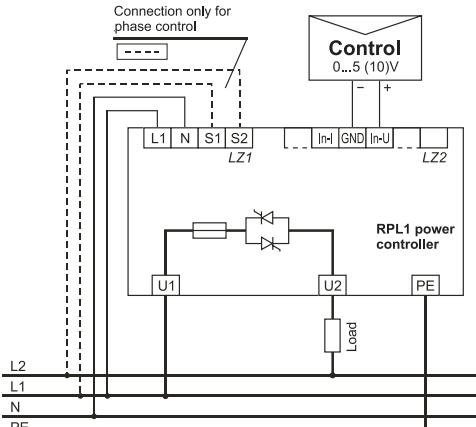

**OUTPUTS**

Output type	Quantity	Range	Remarks
Voltage (Master/Slave)	1	6 ...12 V	non stabilized
Relay	2	NO	60 mA/350 V, $R_{on} = 35 \Omega$ , $U_{izol} = 1500 \text{ V}_{\text{RMS}}$

**ELECTRICAL PARAMETERS OF POWER CIRCUIT**

No.	Max. output current	Load supply voltage	Max. load	Lose power in thyristor
1	25 A	230 V / 50 Hz 400 V / 50 Hz 500 V / 50 Hz	5.7 kW 10.0 kW 12.5 kW	< 40 W
2	40 A	230 V / 50 Hz 400 V / 50 Hz 500 V / 50 Hz	9.2 kW 16.0 kW 20.0 kW	< 65 W
3	70 A	230 V / 50 Hz 400 V / 50 Hz 500 V / 50 Hz	16.0 kW 28.0 kW 35.0 kW	< 120 W
4	125 A	230 V / 50 Hz 400 V / 50 Hz 500 V / 50 Hz	28.0 kW 50.0 kW 62.0 kW	< 215 W

- Leakage current in the thyristor circuit: < 20 mA
- Load type: resistive or resistive-inductive ( $0.2 < \cos\phi < 1$ ), compatible with the category of operational use AC-51 acc. to EN 60947-4-3

EXTERNAL FEATURES																																																																																																																																																																									
Overall dimensions	135 x 201 x 199 mm 135 x 231 x 199 mm - ver. RPL1-x4xx (version with a fan)																																																																																																																																																																								
Weight	4.5 kg 5.0 kg - ver. RPL1-x4xx (version with a fan)																																																																																																																																																																								
RATED OPERATING CONDITIONS																																																																																																																																																																									
Supply voltage a N-L1	195 ... 230 ... 253 V a.c.																																																																																																																																																																								
Supply voltage frequency	50 Hz																																																																																																																																																																								
Power consumption	≤ 4.5 VA																																																																																																																																																																								
Temperature: ambient	0 ... 40°C																																																																																																																																																																								
Temperature: storage	-25...55																																																																																																																																																																								
Humidity	< 90% , without condensation																																																																																																																																																																								
Operating position	vertical																																																																																																																																																																								
SAFETY AND COMPATIBILITY REQUIREMENTS																																																																																																																																																																									
Electromagnetic compatibility	noise immunity noise emissions																																																																																																																																																																								
Pollution level	acc. to EN 60947-4-3																																																																																																																																																																								
Installation category	2																																																																																																																																																																								
Protection grade from terminal side	III																																																																																																																																																																								
Protection grade from casing side	IP10 acc. to EN 60529																																																																																																																																																																								
Noise immunity	IP20 acc. to EN 60529																																																																																																																																																																								
Maximal phase-to-earth voltage	EN 60947-4-3																																																																																																																																																																								
Maximal phase-to-earth voltage	320 V for power circuits and supply, 50 V for other circuits																																																																																																																																																																								
Power controller RPL1 meets the requirements of the norm EN 60947-4-3. <b>Caution:</b> In the case of phase control, the controller meets the requirements of electromagnetic compatibility in terms of noise emissions, only when working near the transition of the supply voltage across zero.
